Gorn is absolutely fantastic. It's like a huge stress ball for taking out your suppressed rage. The weapons work brilliantly and the physics are ridiculously hilarious. I definitely recommend this game.. I expected something lemmings style. The mechanics is quite different, but equally funny.

On the only bad thing is on my ubuntu 14.04.4 it destabilizes steam (I saved dodos, but eventually I had to "kill -9" steam). Nice program, for lazy people

doing it by hand is probably better, but takes up alot of time.

this is fast and 99.9% of the time its done right.

encountered some problems with it, but lets be honest, nothing is perfect!

using it alot. The gardens between is...

- 1.Relaxing -> Visually beautiful, fresh and dreamy...
- 2.Relaxing -> with nice ambient and natural sounds,
- 3.Relaxing -> with no text,no speech,no time pressure,no UI,
- 4.Relaxing -> with simple controls and simple puzzles
- 5.Relaxing -> that prevent almost any feeling of excitement and accomplishment.

Puzzle lovers should buy on sale.

PS:Characters have a... chicken way of moving around :). Starts strong, but never develops anything past the first few levels and straight up degenerates into a poor action game in the last few. Which I wouldn't mind if the game had something else going for it, but the story is basic and the artstyle is pointlessly detailed with gore, yet primitive in regards to everything else.. A very pleasant experience. The teleport locomotion is different than what I'm used to, moving me quickly along instead of blinking me into position. It didn't bother me but I wonder if it might be challenging for some. The graphics are quite good and the controls are easy enough to master. I really enjoyed the initial gameplay.

The game works exactly as intended, I love the card animations and there are hardly any bugs. Just one small problem, however; NOBODY IS PLAYING IT. My friends aren't interested enough (yet) to buy it and I don't feel like forking out cash to buy them copies, so if you're planning on buying this game and playing with strangers, my advice would be to wait a few weeks/months until it gets some more coverage on Youtube.. These models look so fantastic that they make my\u2665\u2665\u2665\u2665\u2665hard.. Please help. bought steam pack before 7 hrs but it didnt added in my account?

my account is in sergent rank. First and foremost I strongly disagree with the metacore, strongly.

If I were to describe this game in just one word I'd without a doubt FUNNY.

Despite having less tracks than I'd want it is a blast to play with friends, and it's not expensive.

I really like how the powerup system was made and it never gets boring to explode other cars.

If you like this kind of racing games give it a shot!

*If you intend to play it online alone I have to say that you'll have a hard time finding people playing except during sales. If you have 2 friends grab a 3-Pack and enjoy!. Here is some info, If you just want to play game\maps that can be played. It won't affect you. If you want to change your player model or build maps, good luck because you gotta buy that stuff.. Maybe if it had players, but it doesn't. And the game's forums are plagued with "wait until it comes out on steam, it'll get players then!" sort of posts, which makes it a running problem.

It's also an inherently simplistic game, so it won't have staying power.. Trying to beat all those ghost cars lap after lap is strangely compelling. Definitely has that "one more go" appeal.. Great DLC! lots of engines to drive! I absolutely love this add-on alot, great companion with Pack 1 or other SD70s in your game. One nice feature is the CN unit has working marker lights. A few scenarios are included as well has a hopper car. Sounds are the same but I replaced those already and it is a good DLC to have.. The spell idea is good but the current magic management is absent, the up-level managment is too simplistic. Could there be most explanations and effects for each upgrade I do? please put some undo buttons. The keyboard is dead. I played it like 15 minutes and I am already fed up with it. Please! somebody needs doing some major work here. Zoom-out is impossible and the auto-camera changes made me feel dizzy, why the fuss? Just allow the user the change the camera as they wish.

Would I recommend this game, No, not at this stage. 13-08-2014. This DLC gives ya pretty OP Processor parts. Keep in mind that, if you don't want to play with the parts, you'll need to unequip them everytime a charakter joins your party, that can wear these. However, especially for postgame\ DLC-areas, they are a good addition.
