## About This Game

**\* This game is currently specialized for operation with HTC Vive and its controller.**

"Sunset Giant" is a VR game that fights big monsters while running through a virtual city illuminated by the sunset.

Your weapon is disposable plasma cannons, only three loaded. Pick up this weapon on the ground or buildings, and attack monsters. The Move operation is a simple with little possibility of VR sickness. Since monsters chase you while destroying buildings, hide behind the building and wait for opportunities to attack back!

24kinds of battle missions are waiting for you. 24th mission is the endless score attack mode.
